

**Sensors: 8**

Synchronized trigger sensor capture for total frame sync from all 8 sensors - very important in post-production

**Fully Stitched Resolution: >8K UHD**

RAW image format

**Live Stream Resolution: 4K**

RAW image format

**Frame Rate: 75 fps**

With high-end global shutter CMOS sensors

**Shutter: Global**

Utilizing the latest technology which debuted in March 2016, you won't find better hardware for shutter synchronization

**Video Output: 10-bit RAW**

Versus 8-bit of competitors, this allows for greater flexibility in post-production

**GPS and 9-Axis Motion Sensor**

Integrated into camera body for geopositioning and inertial measurement unit accelerometer, gyroscope and a magnetometer. This will allow for stabilization of video, even during a live broadcast

**Integrated Microphones for 3D/Binaural Audio**

Plus external mic input and spherical audio support

**Settings**

Unified white balance, shutter speed, gamma is pre-set, but can be adjusted to custom levels by user

**Power Draw**

2 amps, 24-48V (not battery powered)

Stitcher/Encoder can be separated from camera array, connected.
